3-D Artwork Guidelines

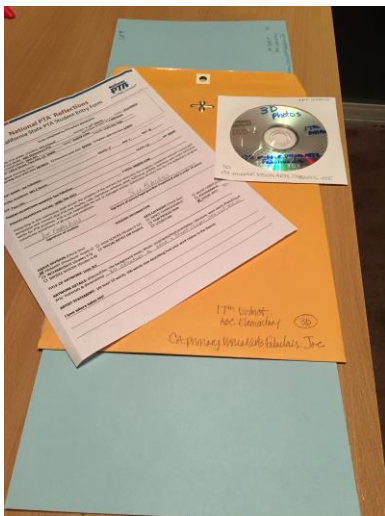

LOCAL UNIT LEVEL JUDGING

Local units may accept photos of 3-D art pieces for judging*, but may be more comfortable with having the actual artwork. If you do not have space at school to devote to storing the 3-D work prior to and after judging, you could specify a particular day that the artwork must be brought in then picked up and have your judge(s) available during that time. Please do not have the students around while the judges are judging. The student would still have to submit a student entry form with the actual entry and the three photos by your due date. Their actual 3-D art would not come in until you were ready to judge. You would have the judge(s) come in, and then have the students retrieve their art after the judges are done. If they place locally such that they would go to the next level (council and/or district), the pictures would serve as the entry until the art is otherwise needed.

HOW TO PHOTOGRAPH 3-D ARTWORK FOR JUDGING

Three electronic photographs of the 3-D piece taken at different angles will be required. The piece itself will need to be kept by the artist in case it is needed for display either at California State PTA or National PTA, but the **artist will be responsible for sending it forward for that purpose.**

SUBMITTING 3-D ARTWORK TO CALIFORNIA STATE PTA Original 3-D artwork **will not** be sent to California State PTA. California State PTA *and* National PTA will **only** be accepting the photos (electronic, CD or USB/Flash Drive) for judging, so the pictures will have to represent the 3-D works of art.
